BINAYAK GURUBACHARYA

bgurubacharya23@augustana.edu | linkedin.com/in/binayakgurubacharya | github.com/JBinayak

EDUCATION

Augustana College | Rock Island, Illinois | Expected May 2027

Bachelor degree in Computer Science and Data Science | GPA: 3.2

Coursework: Algorithms & Computational Theory, Data Structures, Software Development, Web Programming, Data Engineering, Probability & Statistics

EXPERIENCE

Game Developer Intern | Neoteric Nepal

June - August 2024 | Kathmandu, Nepal

Developed 2D and 3D games in Unity with C#. Created reusable character templates, state machines, and environment interaction modules across four gameplay levels. Collaborated on 3D assets, textures, renders, and models in Blender.

Webpage Developer Intern | ConvergeTree

December 2022 - February 2023 | Kathmandu, Nepal

Designed responsive webpages for 5+ client projects. Contributed front-end and client-driven improvements within a full-cycle software development team and redesigned layouts to improve the user experience.

English and Computer Science Tutor | Saathi Nepal

June - September 2022 | Kathmandu, Nepal

Taught English reading, writing, and speaking to 20+ secondary students weekly. Created a computer science curriculum and QBASIC course for 30+ high-school students.

Front-End Developer Intern | PasaPay

March - June 2018 and March - April 2020 | Remote

Improved webpages and implemented front-end features for apps serving 200+ users, with attention to page performance and consistent functionality across platforms.

PROJECTS

Educational HAM Radio Simulator [Code] | Java, JavaFX, Gemini API

Contributed to a team-built simulator. Built server-side chatroom messaging (real-time send/receive and room broadcast) and integrated a Gemini chatbot that participates in chatrooms.

3D Shooter Game [Code] | Unity, C#

Built a single-player 3D shooter with reusable state machines, health tracking, raycast shooting, and ability systems. Public repository contains scripts.

2D RPG Game [Code] | Unity, C#

Created a level-based RPG with sprite animations, modular inventory systems, and scalable combat mechanics. Public repository contains scripts.

Memory Game Webpage [Code] | JavaScript, HTML, CSS, Node.js, Express, MongoDB

Built a browser-based card-matching game with shuffled layouts and move counting. Includes an Express API and MongoDB model for recording player move counts.

Online Portfolio [Code] | HTML, CSS, JavaScript

Designed a responsive personal portfolio to showcase projects, internships, and career progression.

TECHNICAL SKILLS

Python, Java, C#, PHP, CSS, JavaScript, TypeScript, JavaFX, Flutter, Node.js, MongoDB, Express.js, SQL, Unity, Firebase
